Nuances of nature

Where the rocky castles of the Dolomites defy the sky, there is an explosion of light in all its colours that invades luxurious alpine valleys, filling the hearts with peace and nourishing the spirit. It is here where the most famous spas are found dwelling as temples of a worship of wealth that draws its

strength from the closeness to the elements of a wild and untouched nature.

This is how the famous hay baths were born, already known since the beginning of the 1800's together with the treatments with cleansing and rejuvenating mountain herbs.

Dove i castelli rocciosi delle Dolomiti sfidano il cielo, la luce esplode in tutte le varianti cromatiche, invade lussuose valli alpine, riempie il cuore di pace e nutre lo spirito. È qui che sorgono le più famose spa, come templi di un culto del benessere che trae la sua forza dalla vicinanza agli elementi di una natura selvaggia e incontaminata. Nascono così i bagni di fieno conosciuti già dagli inizi del 1800 e i trattamenti con le erbe di alta montagna, purificanti e rigeneranti.

FIEMME FUSIONE DI NOCCIOLA E BRAUN

Crocevia di uomini, storie e tradizione, la valle custodisce un inestimabile patrimonio di sapori che trasformano la tavola in un'esperienza unica. Il gusto è il punto di partenza di un viaggio che coinvolge tutti i sensi in un percorso di mistica appartenenza ai misteri del passato. Un passato che ha visto intrecciarsi le tradizioni di lingua tedesca con quelle lombardo-venete della tradizione tridentina, cosicché le numerose ricette nordiche sono state temperate dall'accostamento di ingredienti semplici del mondo contadino

FINE PORCELAIN STONEWARE

FIEMME

Fusion of hazelnut and braun

Crossroads of men, history and tradition, the valley hosts a priceless wealth of flavours that transforms the table into a unique experience. Taste is the starting point of a journey that involves all senses in a mystical path toward the mysteries of the past.

A past that witnessed the mingling of German traditions with the Lombardy-Veneto ones belonging to the Tridentine tradition, so numerous Nordic recipes have been tempered through the combination of the simple ingredients of the farmer world.

Skilful masteries

GARDENA SAPIENTI MAESTRIE

There is something magical when strolling through these lands where you expect to see people who do not have time to do anything other than the most common tasks. There is a tradition capable of transforming crafts into art, the modelling of pine wood in a deep reflection on our times. Passion and technique, experimentation and attention to detail, imagination of the result starting from the raw material. Contemporary skilful masteries which, each in its own universe, lead us to review our certainties, distinguishing the difference between what is and what seems.

C'è qualcosa di magico a passeggiare per queste terre dove ti aspetti la gente non abbia tempo per dedicarsi ad altro che alle occupazioni più comuni. C'è una tradizione capace di trasfigurare l'artigianato in arte, la modellazione del legno di cembro in una profonda riflessione sul nostro tempo.

Passione e tecnica, sperimentazione e cura del dettaglio, immaginazione del risultato a partire dalla materia prima. Sapienti maestrie contemporanee che, ognuna nel proprio mondo, ci inducono a rivedere le nostre certezze, distinguendo tra ciò che è e ciò che appare.

SIUSI

The diving of the light

The soft slopes of the Siusi Alps are always a natural harbour for the traveller. An extensive ramification of shelters and abbeys depicts a modern and refined welcoming network. Shapes, materials and colours converge into an idea of

hospitality that puts people and their need to share stories and deep emotions, or simply tales of silent descents wrapped in the white, at the Centre. The diving of the light, deep peace and cathartic regeneration.

SIUSI IMMERSIONE DI LUCE

I morbidi pendii delle Alpi di Siusi rappresentano da sempre un approdo naturale per il viaggiatore. Una capillare ramificazione di rifugi e badie disegna una rete d'accoglienza moderna e raffinata. Forme, materiali e colori convergono verso un'idea di ospitalità che mette al centro le persone e il loro bisogno di condividere storie ed emozioni profonde, o semplicemente racconti di discese silenziose avvolte nel bianco. Immersioni di luce, profonda quiete e rigenerazione catartica.

La resistenza allo scivolamento di una superficie è una prestazione che attiene alla sicurezza delle persone; per questo motivo in molti Paesi è oggetto di specifica normativa tecnica. Trattandosi di normative nazionali, i metodi di prova, i requisiti e le classificazioni variano da Paese a Paese. Poiché, allo stato, non esiste una normativa condivisa internazionalmente, la nostra Azienda ha deciso di informare del livello di resistenza allo scivolamento atteso sulle diverse linee proposte, attraverso un valore puramente indicativo della classe R (DIN 51130), A+B+C (DIN 51097), ASTM C1028, B.C.R.A. Trattasi, come è intuitivo, di un primo contributo all'orientamento nella scelta e non di una specifica garanzia; l'Azienda è disponibile, su richiesta, a far testare, da laboratori ufficiali singole partite, del materiale prescelto secondo il metodo di prova indicato dall'utilizzatore.

The slip resistance of a surface is a performance factor affecting people safety; this is why it is the subject of a specific technical standard in many countries. As these standards are national, the test methods, requirements and classes vary depending on the country. As currently there is no standard internationally valid, our company has decided to inform about the expected slip resistance level of the various offered lines through a purely indicative value of the class R (DIN 51130), A+B+C (DIN 51097), ASTM C1028, B.C.R.A. Obviously, this is a first indication for the selection and not a specific guarantee; the company is available, upon request, to have single lots of the chosen material tested by official laboratories according to the test method specified by the user.
